EXPERIENCE

Product Designer & Developer

Carthigan Inc.

Nov 2025 – Present
Kampala, Uganda

- Founded a venture to celebrate African languages; lead product development for Gandalingo, a Luganda learning app with 500+ users.
- Conducted user research with 30+ learners, designed the UX/UI in Figma, and implemented the app in Kotlin/Jetpack Compose with WCAG 2.1 accessibility and a custom Material Design 3 system.

Backend Engineer

Googah Goats Limited

Oct 2025 – Present
Kampala, Uganda

- Architect backend infrastructure using Google AppScript and JavaScript.
- Design data architecture with spreadsheet-based systems and custom automation scripts for operations and analytics.
- Translate stakeholder needs into functional internal tools.

Designer & Mobile Developer

Freelance

2023 – 2024
Remote

- Delivered end-to-end design and development for startups in fintech and hospitality.
- Conducted discovery workshops, created design systems, and built production Android/React Native apps.
- Facilitated design critiques and iterated on user feedback.

Technical Instructor

Neriko Electronics

Oct 2024 – Sep 2025
Kampala, Uganda

- Developed curriculum and taught embedded systems programming (C/C++) and IoT applications.
- Created educational materials and circuit diagrams, refining ability to explain complex technical concepts to diverse audiences.

UI/UX Designer & Developer

CoinPay

Aug 2023 – Dec 2023
Costa Rica

- Designed high-fidelity mockups and prototypes for a fintech platform in Figma.
- Optimized payment flows to reduce friction; implemented designs in React Native and native Android with pixel-perfect accuracy.

Data Analyst

Hammer Uganda Limited

2024 – Dec 2024
Kampala, Uganda

- Analyzed RF signals for network expansion (Huawei/Lyca Mobile).

- Developed Python scripts for data processing and visualization of signal strength patterns.

PROJECTS

Gandalingo – Luganda Language Learning Platform

[View Repository](#)

Kotlin, Jetpack Compose, Material Design 3, WCAG 2.1

- Production app with 500+ users; information architecture for 6 proficiency levels, 40+ custom components, and comprehensive accessibility features.
- Smooth micro-interactions and a custom design system built from user research with 30+ Luganda learners.

Pizza Vesuvio – Unified Restaurant Ordering Platform

[View Repository](#)

Kotlin, Swift, JavaScript, Android, iOS, Web

- Designed and developed a unified ordering experience across Android, iOS, and web with a warm visual aesthetic.
- Photographed menu items, created platform-specific apps, and built a cohesive cross-platform brand identity.

HTML-TO-DESIGN – Penpot HTML Conversion Plugin

[View Repository](#)

TypeScript, Svelte 5, Vite, Penpot Plugin API

- Plugin for the open-source design tool Penpot that parses live HTML DOM trees and rebuilds them as editable native Penpot shapes.
- Sandbox-safe plugin architecture with typed UI↔plugin messaging and progressive conversion feedback; 8+ stars on GitHub.

SKILLS

Design

Product Design
User Research
Wireframing & Prototyping
Design Systems
Figma & OnCapture
Adobe Photoshop
WCAG 2.1 Accessibility

Development

Kotlin (Android)
Swift (iOS)
React Native
Jetpack Compose
JavaScript / TypeScript
Python, C/C++
Material Design 3

Creative

Photography
Music Production
Screenwriting
Visual Storytelling
Brand Identity
Languages

English (Fluent)
Luganda (Native)
French (Intermediate)

EDUCATION

Associate Degree in Electrical Engineering & Computer Science

University of the People

2025 – 2027
United States

Diploma in Electronics and Electrical Engineering

Uganda Institute of ICT

2025 – 2027
Uganda
